Windows PC and Mac use different filesystems The Windows uses NTFS and Mac uses HFS.. Before you begin to use your new external hard drive with Aperture, reformat it to the Mac OS Extended file system: Be sure your drive is attached and mounted.. Then, connect Seagate drive to your PC and make sure that it can be detected by Windows.. They are incompatible with each other So, if you want to use an external hard drive on both Windows and Mac, you need to format it to a filesystem that is compatible with Windows PC and Mac.
